

Brainstorming & Idea Prioritization Template

Date	15 March 2024
Team ID	XXXXXX
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	P.Nisanth Manikanta	AI-based Emotion Detection using BERT and BiLSTM	Sentiment Extraction	
2	P.Nisanth Manikanta	Build a sequential deep learning classifier (BiLSTM) for immediate, lightweight sentiment scores.	ML Modeling	
3	Abhishek Kojja	Implement a pre-trained Transformer model (BERT) to run deep contextual secondary sentiment analysis.	ML Modeling	
4	Kaviti Sri Anirudh	Connect to the Gemini API to dynamically generate personalized study tips and coping strategies.	LLM Integration	

5	Kaviti Sri Anirudh	Develop an analytical dashboard showing emotional distributions, trends, and logs.	Analytics & UI	
---	---------------------------	--	----------------	--

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Multi-Model Emotion Detection Core: Real-time sentiment evaluation using custom PyTorch-based BiLSTM and BERT models.	High	High	High	Yes
2	Generative Learning Support Engine: Instant study strategies queried through the Gemini API	High	High	High	Yes

	based on user context.				
3	Interactive Analytics Dashboard: Visual analytics monitoring emotion distributions across fields of study.	High	Medium	Medium	Yes
