### Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

| SAYS                                                                                                                                                                             | THINKS                                                                                                                                                                                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>"I feel stressed before exams and assignments."</p> <p>"Sometimes I don't know where to begin studying."</p> <p>"I wish someone could guide me based on how I'm feeling."</p> | <p>"Will I score well in my exams?"</p> <p>"I am afraid of failing difficult subjects."</p> <p>"Maybe I am not studying effectively."</p> <p>"I need a better learning strategy."</p> |

|                                                                                                                                                                                                                   |                                                  |                                                                                                                                                                                                                                                |
