Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Opens the Streamlit application. • Selects academic field. • Enters learning problem or concern.	• BERT/BiLSTM predicts emotion. • Gemini AI generates personalized guidance.	• Reviews emotion prediction. • Studies recommended learning strategy. • Checks analytics dashboard and history.
Touchpoint <i>What part of the service do they interact with?</i>	• Streamlit Home Page • Input Form • Sidebar Navigation	• Emotion Detection Module • BERT Model • BiLSTM Model • Gemini AI Service	Analytics Dashboard • Emotion Charts • Session History • CSV Database

Customer Thought <i>What is the customer thinking?</i>	• "I need help with my studies." • "Can AI understand my emotions?" • "I hope this gives useful advice."	• "Is the detected emotion accurate?" • "The AI response should be personalized." • "This guidance should help me prepare better."	• "I can monitor my emotional progress." • "These recommendations are useful." • "I feel more confident about learning."
Customer Feeling <i>What is the customer feeling?</i>	• Curious • Anxious • Hopeful	• Interested • Relieved • Engaged	• Confident • Motivated • Satisfied
Process Ownership <i>Who is in the lead on this?</i>	Student (Independent self-study phase).	Core Web App Pipeline Controllers (app.py & model endpoints).	gemini_service.py & AI Integration layers.
Opportunities <i>How can we improve this stage?</i>	Provide standard, easy-to-access emotional check-ins inside learning environments.	Optimize model latency (BiLSTM vs. BERT) to keep predictions responsive.	Continuously refine prompts sent to the Gemini API to match specific technical domains.
